SUMMARY

Third-year B.Tech CSE student with internships at IIT Bombay and NCCU Taiwan. Skilled in Python, React, and cloud technologies with project experience in AI, Web Development, App Development, AWS. Seeking opportunities in software development and AI applications.

EXPERIENCE

Python Programmer
Thought Bliss Solution (TBS)
Pune, India (Remote)
- Completed a 7–8 week internship focused on Python programming.
- Strengthened problem-solving skills and applied Python in practical scenarios.

UI Developer
FOSSEE, IIT BOMBAY
Mumbai, India
- Contributed to the OSDAG open-source software for steel structure design.
- Worked on UI components, coding, debugging, and feature enhancements.

Research Intern
National Chung Cheng University
Taiwan (Remote)
- Worked on skin cancer detection using Hyperspectral Imaging (HSI).
- Gained exposure to real-world applications of AI and medical image processing.

EDUCATION

Diploma in Computer Science and Engineering, Gautam Polytechnic Institute
Aug '22 — Apr '24
Kopargaon, India

B.Tech in Computer Science and Engineering, Sanjivani University, Kopargaon
Sep '24 — Present
Ahilyanagar, India

AWARDS & ACHIEVEMENTS

3rd Place in Spectra Vision International Workshop
National Chung Cheng University, Taiwan

Technical Head
CSE Department

PROJECTS

Swift Pay Application Development
- Built a digital payment app with an AI assistant and multi-user switching.
- Integrated strong security features such as PIN, OTP, and Gmail verification.

Edu Vision Platform
- Developed a custom ERP portal with features like study groups, doubt-solving, timetable & assignment management, and announcements.
- Added interactive tools including quizzes, code compiler, and AI-powered academic assistance.

VillageMarts – E-commerce App for Rural Communities
- Created a digital marketplace with separate apps for Customers, Partners, and Delivery.
- Enabled villagers to order groceries and essentials with real-time tracking.

SKILLS

Programming Python, Java, C++, ReactJS, TypeScript
Frontend HTML, CSS, TypeScript, React
Backend MySQL, Firebase, Supabase
Cloud AWS
Tools Git, UiPath (RPA Software)
